

BICEL 20th ANNIVERSARY SYMPOSIUM

July 2, 2010

Time	Speaker	Title
9.00	Jean-Claude Martinou (Université de Genève)	Welcome address
9.10	Gisou van der Goot (EPFL, Lausanne)	Unconventional ligand triggered endocytosis of the anthrax toxin
9.55	Marisu Balda (University College, London)	Towards understanding tight junction functions
10.20	COFFEE BREAK	
10.50	Gilbert Di Paolo (Columbia University, NY, USA)	Lipid signaling at the synapse: from normal function to potential implications in Alzheimer's disease
11.35	Philippe Pierre (Centre d'Immunologie, Marseille)	Dendritic cells, microbes and stress or how to translate pathogen detection into a productive immune response
12.00	Rainer Pepperkok (EMBL, Heidelberg)	Illuminating the secretory pathway
12.25	LUNCH BREAK	
13.45	Xavier Roucou (University of Sherbrooke, Canada)	Neurotoxic mechanisms in prion diseases
14.10	Rachid Mazroui (Université Laval, Québec, Canada)	Cytoplasmic Stress Granules: Assembly, disassembly and role in cell resistance to apoptosis
14.35	Oliver Weichenrieder (Max-Planck, Tübingen, Germany)	Mobile genetic elements in the human genome-insights from structural biology
15.00	Doug Black (UCLA, Los Angeles, USA)	Mechanisms and Programs of Neuronal Alternative Splicing
15.45	COFFEE BREAK	
16.15	Katja Strässer (Genzentrum, München)	to be announced
16.40	Marcello Maggiolini (University of Calabria, Cosenza, Italy)	GPR30 is the next crossroads of estrogen signaling
17.15	APERIO	

Talks are 45' and 25' **including** discussion.
